

May 8, 2008

Dear Optima Family Care Member:

The company that makes Digitek® is recalling the drug. This recall is effective immediately. The generic name for Digitek® is digoxin and other companies make digoxin.

If you are still taking Digitek®, you need to contact your doctor's office immediately. The office is expecting your call. Your doctor may want you to get a new prescription or may want you to come into the office so he or she can check the amount of digoxin in your blood.

If you have any questions, please contact Member Services at 757-552-8975 or 1-800-881-2166. We look forward to serving you and your family in the months and years to come.

Thank you,

Deno E. Sebastian, R.Ph., M.S.A.
Director of Pharmacy
