

STAYING HEALTHY

# Making Exercise A Lifestyle Choice

**Plan ahead.** Make physical activity a regular part of your daily schedule and write it on your calendar. Plan to be active most days of the week.

**Add physical activity to your daily routine.** Walk or ride your bike to work or when going shopping. Park farther away from your destination or exercise while you watch TV.

**Set goals.** Short periods of at least 10 minutes of physical activity throughout the day will add up health benefits.

**Prevent injury.** Learn how to warm up and cool down; wear the proper clothing and shoes.

**Chart your progress.** Keep a written log, or use [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) to track your progress.

**Weather-proof your activities.** Indoor activities like dancing, calisthenics, stair-climbing, jumping rope, and mall walking are always available.

**Exercise for energy.** Schedule physical activities when you feel most energetic, and watch your energy level increase as you continue to exercise.

**Consult with your doctor,** if you have a chronic health condition, about the types and amounts of physical activity that are right for you.

**Most of all...have fun.** Select physical activities you enjoy and that match your abilities, and stick with them.
